

Okal Sentry Bollards

HIGH SECURITY BOLLARDS

High Security Bollards crashed rated from K4 and upwards. These bollards are designed to exceed your expectations, for security, looks and costs. Engineered to withstand a crash from 6,800kg at 45km per hour.

Security Solutions

- Anti-Terrorism
- High Security
- Shallow Mount Solutions
- Car Thieves
- Ram Raiders
- Hoodlum Drivers
- Parking Bay Invaders
- Traffic Control Problems

PROFESSIONAL INSTALLATION

The shallow mount bollards were developed to overcome the installation challenges associated with crash rated bollards. Crash rated bollards typically require foundation depths of 1000mm or more to achieve desired crash ratings. Installation of a standard crash rated bollard in major metropolitan cities, where the area under the pavement and streets are crowded with utilities and other infrastructure was impossible, until now.

Shallow Mount High Security
Bollard

Shallow Mount High Security Bollard

The High Security Shallow Mount Bollards are an innovative solution for the city street areas and other areas where deep excavation simply isn't an option. Areas where plumbing, sewage, electrical conduits and other under ground obstacles would hinder a deep bollard installation.

The Shallow Mount Bollard Series are a practical solution for the city streetscapes and other areas where large excavation simply isn't an option. These bollards carry a K4 DOS certification giving your business, government facility or high traffic problem areas the security they need.

As you can see from this picture, these bollards, are the perfect solution when the placement area has under ground wiring, sewage or other obstacles not allowing for a normal bollard installation.

The placement of the Shallow Mount Bollard doesn't extend far into the ground.

Decorative sleeves can be placed over any of the bollards to create a solution to match the architectural decor of the building. The decorative sleeves come in several optional shapes and can be coated to match your sites specific colour requirements.
